

Fullstack developer and technical lead on two commercial products. End to end on .NET APIs, React and TypeScript frontends, SQL Server schemas and Windows Server deployment, including LLM-backed features in production. Owns production incident response and .NET version migrations, interviews junior candidates and mentors new hires. Prefers to ship things that don't need a developer afterwards.

WORK EXPERIENCE

Fullstack Developer · TheDevTeam Ltd Jan 2024 — Present
Seven commercial products; technical lead on two.

Eclipse Miningware
SaaS mine-site production management. React, .NET, SQL Server, SignalR. Technical lead since inception.

- Led from inception to production across 5 areas of mine operations: Load & Haul, Drill & Blast, Ore Control, Plant, Maintenance.
- Replaced paid, multi-week change requests with LLM-backed natural-language reporting over live production and financial data.
- Moved SignalR dispatch and dashboard recalculation into a background queue, keeping write response times flat under load.

Denaploy Manuals
Documentation and status tracking for UK commercial construction. .NET, MSSQL, Microsoft Graph. Technical lead.

- Owned architecture and production support for 3,400+ construction projects across 50 client organisations.
- Rewrote quotation as a standalone .NET API with NCalc-configurable formulas, so admins change pricing rules with no deploy.
- Built RiDR, a Microsoft Graph search layer finding files by filename or full document content.

Unique Magazines
UK magazine e-commerce and warehouse distribution. .NET, Razor, MSSQL.

- Built a like / dislike / love reaction system feeding live recommendations for 31,000 users; 250,000+ reactions.
- Extended personalisation to non-authenticated visitors via cookies, migrating preferences into the account on signup. Shipped Click & Collect end to end.

Newsstand
One of the UK's largest magazine retailers. .NET, Razor, MSSQL, React. One of 2 devs.

- Built the Stockists B2B portal from scratch in React and .NET: retailer accounts, catalogue, ordering with payment.
- Opened a new wholesale channel: 74 trade accounts and 266 orders in its first 8 months,

Concerto · RedWizard Consulting
White-label consultancy assessment platform. React, .NET, LLM integration.

- Built an LLM-backed assessment chat that interviews a business through structured questioning and generates a written report.

Also delivered
– WTN (Community Wood Recycling) — rewriting a legacy Xamarin field app in Flutter, nearing release.
– Rewrote the company website to Next.js, deployed behind an IIS reverse proxy with PM2 boot persistence.

SKILLS

Core
C#, .NET 8-10, ASP.NET Core, Razor, Entity Framework Core, Dapper, SignalR, REST APIs, SQL Server / T-SQL, React, TypeScript, Redux, Next.js

Also
Flutter / Dart, LLM API integration, Microsoft Graph, MobX, Firestore, React Query

Infrastructure
IIS / Windows Server, reverse proxy configuration, PM2, background workers and hosted services, framework version migration

Practices
Technical leadership, code review, technical interviewing, agile delivery, client-facing requirements work, technical writing

Learning
Angular

EDUCATION

BSc, Automation & Robotization of Industrial Processes
Warsaw University of Technology

LANGUAGES

Polish — native
English — C2, daily working language with UK clients and technical writing
